HALL OF FINE ARTS

MAIN BUILDING

LIBRARY

EQUIPMENT: Phillips University is located in Enid, Oklahoma. Its plant is spacious and complete. It consists of five good buildings, well equipped in all their appointments. The institution has approximately two acres of floor space. Its laboratories in Physics, Chemistry and Biology are complete. It has a first class library. Its gymnasium contains a standard basket ball court; it is well equipped with running track, shower baths and complete apparatus.

COLLEGE OF LIBERAL ARTS: The College of Liberal Arts offers courses in nine distinct departments. It has combined courses leading to Law, Engineering, Journalism, Medicine, Education and the Ministry. Credits given by the College of Liberal Arts are recognized by some of the best Universities.

SCHOOL OF EDUCATION: A complete course preparatory to teaching is offered in the School of Education. The credits are recognized by the State Boards of Education of Kansas and of Oklahoma. The degree of Bachelor of Arts carries with it the right to a State Certificate of the same rank as granted by the State University.

COLLEGE OF THE BIBLE: The College of the Bible offers complete courses in preparation for the ministry, mission field, church and general religious work.

COLLEGE OF FINE ARTS: The College of Fine Arts has gained recognition among musicians for the high quality of work rendered. It has superior talent on its faculty and is well equipped with the necessary studios and instruments. Complete courses are offered in voice, piano, violin, pipe organ, wind instruments, oratory and expression, and fine art.

HIGH SCHOOL: For the benefit of those who may not have completed the requirements for college, we maintain a high school which is recognized by the North Central Association of Secondary Schools. Young people who have not finished their high school course, will find this a desirable place in which to complete this work.

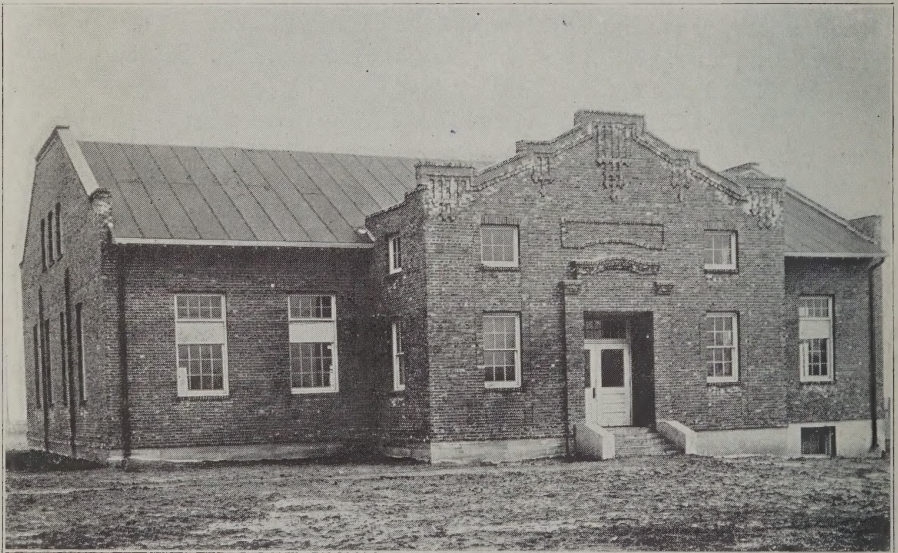

GENERAL ADVANTAGES: The student body consists of about 400 young people, drawn from Oklahoma, Kansas and surrounding states. This is a large enough student body to create interest in both academic work and social circles, but has the advantage of not being over crowded. For the number of students enrolled, and for the courses given, Phillips University offers as good facilities, in way of plant, library, laboratories and faculty, as is to be found in any similar institution.

EXPENSES: The tuition varies according to the department in which the student is enrolled. Board is furnished at about \$3.00 per week, room \$1.00 per week. Social life is interesting and good, but inexpensive.

For general catalogue, or any desired information, address The Chancellor, Phillips University, East Enid, Oklahoma.

COLLEGE COURSES PREPARE FOR NOTHING?

It is charged by many that the general college course prepares for no real activity in life. Not a few assert that much which has been learned in college needs to be unlearned before the college graduate can successfully fill a place of service. Notable examples of college men who are failures are cited. Statistics, on the other side are equally convincing. The men and women who make pronounced success, especially in what is known as the learned professions, are in the main college graduates.

A COLLEGE THAT DOES PREPARE FOR SOMETHING COMBINED COURSES.

Phillips University has made full arrangements to offer, in addition to our regular four year college course, the following college courses which prepare for some definite thing:

- 1st. ARTS-LAW
- 2nd. ARTS-ENGINEERING
- 3rd. ARTS-JOURNALISM
- 4th. ARTS-MEDICINE
- 5th. ARTS-EDUCATIONAL
- 6th. ARTS-MINISTERIAL.

These courses are all fully outlined and appear in our general catalogue. Students in the University already are pursuing these combined courses. In these courses, the student will take the first three years of his college course in our college of Liberal Arts, the fourth year of his course leading to the A. B. or B. S. degree will be taken in any approved school of Law, Engineering, Journalism, or Medicine; (the courses in Education and in the Bible may be completed in Phillips University) this will shorten by one or two years the time required to secure both a literary degree and a professional degree. Most of the best professional schools now require three or four years college training before entering. Our three

year course as outlined will admit to all colleges, except the one or two that require a degree for entrance. Statistics prove that men who have college training have the best chance of succeeding in their respective lines. If you are interested in any of the above professions, send for our catalog describing these courses in full.

DESCRIPTION OF COURSES.

Phillips University has an admirable system for the distribution of work of all college students during their Freshman and Sophomore years. Students in these combined courses will elect their work during their first two years just as all regular college students elect their studies. Students in the Arts-Law course will take strong courses in English with most of their work in Social Science and Philosophy. The Arts-Engineering students will take most of their work in the Science group, including Mathematics, Physics and Chemistry. The Arts-Journalism students will make their major in English with strong courses in Philosophy and Social Science. The Arts-Medical students will devote most of their time to the Biological and Physical Sciences. The Arts-Ministerial students will devote most of their time to the language and Biblical groups. Teachers will take a major in Educational subjects. To appreciate these courses you need our catalog. Send for one. It is yours for the asking.

BROADENING INFLUENCE AN ESSENTIAL REQUIREMENT

One of the common reasons for failures in professions is the inability to understand men in other professions. The young man who has prepared himself for his special work in a special school is apt to know the world from his own stand-point only. He cannot understand or appreciate the view point of others. If the professional man has a part of his training in the school where he sits side by side with men who are preparing for other professions, he comes to know them, their aims, ambitions and view points, and is in a position to understand them better. This will be a valuable asset to him when he

BROADENING INFLUENCE AN ESSENTIAL REQUIREMENT

One of the common reasons for failures in professions is the inability to understand men in other professions. The young man who has prepared himself for his special work in a special school is apt to know the world from his own stand-point only. He cannot understand or appreciate the view point of others. If the professional man has a part of his training in the school where he sits side by side with men who are preparing for other professions, he comes to know them, their aims, ambitions and view points, and is in a position to understand them better. This will be a valuable asset to him when he

comes to deal with them in business or professional life after leaving school. The man trained in such a school has a better grasp of conditions, as they are in professions, than the man who has training only in a special school. We are now offering all students the advantages to be secured from this broadened fellowship and association of professional students. There are now students in Phillips preparing for all the above professions. We wish you to enjoy these advantages we have provided for you.

ENVIRONMENT

The school environment is a powerful influence for forming character. Many a boy or girl has lost completely in after life, because of pernicious habits formed while in school. The Christian school has a distinct advantage in the matter of character formation, because of its environment. A very large per cent of its students are Christians and are active in the various Christian associations. The teachers in Phillips University are Christians. Over eighty-five per cent of the student body are members of the church. We all recognize that it is easier to do the right thing under the influence of men and women of high ideals. The habits formed during ones college days are apt to characterize him through the rest of his life. An examination of the scholastic record of prominent men shows that a large percent had their college training in the Christian schools.

EXPENSES.

It seems almost incredible that it should cost less to attend a school charging tuition than to attend an institution charging none. But it is proven by the experience of students who have tried both, that such is the case. An investigation will convince you that these statements are correct.

For fuller description of courses and definite estimate of expenses, write the Chancellor, Phillips University, East Enid, Oklahoma.

No. 9

MY DEAR YOUNG ~~PHILLIPS~~ ^{UNIVERSITY} PRESIDENT'S OFFICE

You probably have received numerous communications from us during the past months. You may have been attracted by our bulletins, the general catalogue or the catalogue of the School of Fine Arts. If you have given these any study, you doubtless have been impressed with some of the merits of our school.

Our literary and scientific courses offered in the College of Liberal Arts are of as high order as are to be found anywhere. Our credits are accepted by the State Board of Education of Oklahoma and by the State Board of Education of Kansas in lieu of examinations on teachers' certificates. The diplomas in Arts-Education are given the

same recognition as that given the diplomas of the state institutions. Our credits are being accepted by large universities for advanced standing. The instruction is offered by teachers who are well prepared for their work and who keep in close touch with the most advanced methods. Our laboratories and library are up to date and complete. Our School of Fine Arts has superior talent on its faculty. Studios and practice rooms are fully equipped. The chapel contains a two manual organ. This is put at the disposal of the organ students.

The Administration Building, the Hall of Fine Arts, the Library and Athenian Hall are all in good repair and in the very best condition. The Gymnasium is one of the best buildings of its kind in this section of the country. The main room is 60 by 84 feet. It contains a running track and standard size basket ball court. The floor is well equipped with apparatus. The building has separate apartments for ladies and gentlemen, each supplied with shower baths, lockers, etc. It has offices for director and coach.

The members of the faculty have enjoyed a splendid vacation and are coming refreshed and invigorated for the session's work.

To the former students of Phillips University, we express the hope that you are enjoying a pleasant and profitable summer. Many of the old students are planning to return. We hope you will be

among the number. The indications are that there will be a large enrollment of new students.

The session will open Tuesday, September 14th. Tuesday and Wednesday will be given over to enrollment. Class work will begin Thursday, September 16th. If you have not decided to cast your lot with us can you not yet arrange to come to Enid by the middle of September and avail yourself of the privileges and opportunities offered for the next nine months.

If you desire a catalogue or information on any matter relative to the College or attending College, address the undersigned, care Phillips University, East Enid, Oklahoma.

Very respectfully yours,

O. N. ROTH, Chancellor.

Are You Ready?

UNIVERSITY OF ILLINOIS
SEP 2 1915
PRESIDENT'S OFFICE

The time was when it was thought that an education could be had only by the favored few. Now it is not only enjoyed by a large per cent of the citizenship of America, but it is felt to be somewhat of a disgrace for the American youth to come to his majority without a fair degree of education.

While an education enlarges the life of any individual, giving broader experience and enlarged interest thus partaking of the nature of a luxury; it is more than a luxury; it is a necessity. Preparedness is a requisite for entrance into the field of industry. Industry is expecting every person entering its employ to be prepared to do the thing he claims to be able to do. "Preparation" is the pass-word of entry.

Men who aspire to serve the public in an efficient manner are not recognized until preparation for efficient service is made. The person who attempts to go through life without fitting himself to do something well is seriously handicapped. Every individual is asked "What can you do?", and is given a position in keeping with the manner in which he answers the question; not so much by word, as by action. Places are open for the man who can do, but a most pitiable object is the man who is not fitted for some useful work. There seems to be no place for him.

Competition has grown strong not only in commerce but in the production of hand and of brain. The

man who does not learn how to do something with skill and finish will be left behind in the race. The difference is distinctly recognized between the man who has fitted himself and the man who has not, both in financial remuneration and in social status. No better investment of four or six years can be made by a young man or a young woman than to invest that time in a College education. A College education represents the struggle of a young person to attain a higher plain of experience and usefulness. It requires an effort that sometimes seems to be beyond the courage or ability of the individual. The tourist does not ascend to the top of the mountain by walking down hill or even on a level. He who is not willing to put forth an effort to climb to the top will never experience the expanse of vision gained by mountain heights. He who walks on a level in his work will through the years of his activity circle around on the same plain. Though it may require an effort to ascend to a higher plain of activity, it is possible for any boy or girl to do so who has sufficient courage, perseverance and energy.

Two things will concern a young person when he comes to select his College. First; he will be interested in the College that can give something in culture, training and force of character; and that will prepare him for his chosen field of activity. Second: The average young person is concerned as to the required outlay of money.

PHILLIPS UNIVERSITY offers courses in Arts-Law, Arts-Medicine, Arts-Journalism, Arts-Engineering, Arts-Education and Arts-Ministerial. These courses are well adapted for preparation in these several lines of activity. The regular scientific and literary courses upon which the Baccalaureate Degrees are conferred are offered complete. The credits are being accepted by the larger Universities for advanced standing.

The various departments are offered by competent instructors who have at their disposal all needed apparatus in laboratory, and full and up-to-date references in library.

Credits in the Department of Education receive the same recognition on teachers certificates as accorded the credits of the state institutions of Oklahoma and of Kansas. Though this is a new Department in Phillips University she already has a number of her alumni in good positions in high schools. Their merits are being recognized and calls are constantly coming for our graduates who are fitted to handle high school positions.

The Ministerial Department is turning out yearly most capable young men who are entering good pulpits and who are serving the churches and communities where they live in a most acceptable manner. Every year more calls are received for Phillips University graduates to locate with churches than we have men to fill.

The College of Fine Arts has grown to be one of the strongest in the South West. The courses are organized according to the standards established by the best conservatories. The College maintains two Professors of Voice, four of Piano, one of Violin, one of Pipe Organ, one of Wind Instruments, one of Oratory and Expression and one of Fine Art. These are all teachers who have made extensive preparation both in study and travel. Years of experience in their chosen profession have made them efficient instructors. Thorough and high grade work marks its students. The College is well equipped with pipe organ, necessary pianos for studios, for practice and for concert work.

For the benefit of those who have not finished the work in high school, a High School is maintained. This Department has acquired the standard set by the North Central Association of Secondary Schools and is a member of that organization. Here an excellent opportunity is afforded those who carry music with their high school or whose preparatory work has been neglected.

Few Colleges have made better preparation for the athletic side of student life. A splendid Gymnasium containing the standard size basket ball court, running track and complete apparatus has been erected

for the accommodation of the student body. Foot ball, basket ball, base ball and track teams are under the training of a competent coach. The work on the floor of the gymnasium is under the instruction of a physical director. Young ladies gymnasium classes and basket ball team will be under the supervision of a lady director.

Special provision is made for the accommodation of young ladies in Athenian Hall. This building is modern and complete in its appointments. It is presided over by the Dean of Women. Every attention is given to preserve the best health and conduct of the young ladies.

The student body at Phillips University is sufficiently large to make student life interesting both from the academic and social standpoint.

The expenses are moderate. Tuition varies according to the Department and the amount of work taken. The average cost of board, room and tuition for the year is \$200.00. While the social life is interesting it is not expensive, thus enabling the student to hold the incidental expenses to a minimum.

The next session opens September 14. If you are interested in attending College and desire a catalogue or information address the Chancellor, Phillips University, Box 8, East Enid, Oklahoma.
